Overview of this manual

About this manual

This manual contains spare parts for:

- IRB 140 and all its variants.

Usage

This manual shall be used as a complement to the product manual for IRB 140 during:

- maintenance work
- repair work.

Who should read this manual?

This manual is intended for:

- maintenance personnel
- repair personnel.

Prerequisites

Maintenance/repair/installation personnel working with an ABB Robot must:

- be trained by ABB and have the required knowledge of mechanical and electrical installation/repair/maintenance work.

Organization of chapters

The manual is organized in the following chapters:

Chapter	Contents
1 Rebuilding robot	Information of rebuilding parts, required when rebuilding the robot to another version.
2 Spare parts and exploded view	Complete spare part list and complete list of robot components shown in exploded views.

References

Reference	Document ID
<i>Product manual - IRB 140</i>	<i>3HAC027400-001</i>
<i>Circuit diagram - IRB 140 type C</i>	<i>3HAC6816-3</i>

Revisions

Revision	Description
-	First edition
A	Spare parts with color Graphite White are added to the spare part lists.
B	Corrected spare part number for 'lower arm'
C	This revision contains the following updates: <ul style="list-style-type: none"> • Corrections due to updates in SAP terminology. • Motor spare parts for IRB 140 type0 deleted from the spare part lists.

Product documentation, IRC5

Categories for user documentation from ABB Robotics

The user documentation from ABB Robotics is divided into a number of categories. This listing is based on the type of information in the documents, regardless of whether the products are standard or optional.

All documents listed can be ordered from ABB on a DVD. The documents listed are valid for IRC5 robot systems.

Product manuals

Manipulators, controllers, DressPack/SpotPack, and most other hardware is delivered with a **Product manual** that generally contains:

- Safety information.
- Installation and commissioning (descriptions of mechanical installation or electrical connections).
- Maintenance (descriptions of all required preventive maintenance procedures including intervals and expected life time of parts).
- Repair (descriptions of all recommended repair procedures including spare parts).
- Calibration.
- Decommissioning.
- Reference information (safety standards, unit conversions, screw joints, lists of tools).
- Spare parts list with exploded views (or references to separate spare parts lists).
- Circuit diagrams (or references to circuit diagrams).

Technical reference manuals

The technical reference manuals describe reference information for robotics products.

- *Technical reference manual - Lubrication in gearboxes*: Description of types and volumes of lubrication for the manipulator gearboxes.
- *Technical reference manual - RAPID overview*: An overview of the RAPID programming language.
- *Technical reference manual - RAPID Instructions, Functions and Data types*: Description and syntax for all RAPID instructions, functions, and data types.
- *Technical reference manual - RAPID kernel*: A formal description of the RAPID programming language.
- *Technical reference manual - System parameters*: Description of system parameters and configuration workflows.

Application manuals

Specific applications (for example software or hardware options) are described in **Application manuals**. An application manual can describe one or several applications.

An application manual generally contains information about:

- The purpose of the application (what it does and when it is useful).
- What is included (for example cables, I/O boards, RAPID instructions, system parameters, DVD with PC software).
- How to install included or required hardware.
- How to use the application.
- Examples of how to use the application.

Operating manuals

The operating manuals describe hands-on handling of the products. The manuals are aimed at those having first-hand operational contact with the product, that is production cell operators, programmers, and trouble shooters.

The group of manuals includes (among others):

- *Operating manual - Emergency safety information*
- *Operating manual - General safety information*
- *Operating manual - Getting started, IRC5 and RobotStudio*
- *Operating manual - IRC5 Integrator's guide*
- *Operating manual - IRC5 with FlexPendant*
- *Operating manual - RobotStudio*
- *Operating manual - Trouble shooting IRC5*

Robot IRB 140, spare parts list

The items specified below are shown in the figures *Robot IRB 140, exploded view 1 of 5 on page 16* to *Robot IRB 140, exploded view 5 of 5 on page 20*.

Item	Article number	Part	Protection type	Color	Note
1	3HAC10470-1	Base spare			
2	3HAC8999-1	Bottom plate			
3	9ADA629-44	Torx pan head roll. screw			M5x12
4	3HAC6599-1	Gasket bottom plate			
5	3HAC17396-1	Serial measurement unit			Contains serial measurement board 3HAC031851-001 and battery back 3HAC16831-1.
5	3HAC031851-001	Serial measurement board			DSQC 633A
5	3HAC046277-001	Serial measurement unit			Contains serial measurement board 3HAC044168-001 and battery unit 3HAC044075-001.
5	3HAC044168-001	Serial measurement board			RMU 101
6	3HAC16831-1	Battery back (2-pole battery contact)			Lithium 34x102x63 Can only be used with SMB unit 3HAC17396-1 containing SMB board 3HAC031851-001.
6	3HAC044075-001	Battery unit (3-pole battery contact)			RMU Lithium 7.2V 3.6Ah Can only be used with SMB unit 3HAC046277-001 containing SMB board 3HAC044168-001.
-	3HAC046686-001	SMB replacement set			Contains all parts needed if SMB unit 3HAC17396-1 shall be replaced with SMB unit 3HAC046277-001.
7	21662055-6	Cable straps, outdoors			7.6x368
8	9ADA618-46	Torx pan head screw			M5x20
9	3HAC9030-1	Cable bracket			
10	3HAC9415-1	Clamp			
11	3HAC6755-1	Cable holder			
12	9ADA618-50	Torx pan head screw			M5x40
